Junior Developer

CS graduate with experience in C++, Java, SQL, object-oriented design patterns, and software testing methodologies. Seeking an Entry-Level Software Engineer role to contribute clean, scalable code and strong problem-solving skills to a dynamic engineering team.

WORK EXPERIENCE

Comet S.p.A. • **Bologna** • **02/2021 - 03/2026**

Comet S.p.A. is an electronics company that provides a wide range of electronic devices for personal and residential use.

Web Content Intern • **Internship**

Assisted with the company's e-commerce website modifying graphical content on the website using programs like GIMP and Adobe Photoshop.

OXYGEN AUTOMATION S.R.L. • **Bologna** • **02/2020 - 03/2020**

Oxygen Automation | E-commerce retailer specializing in residential and industrial gate automation systems, swing/sliding gate motors, and smart access control solutions.

E-commerce Clerk • **Internship**

Supported daily e-commerce operations for a gate automation supplier by managing order dispatch accuracy and customer communication channels. Primary duties included verifying delivery codes against destination records to eliminate shipping errors, monitoring primary company email accounts to address order and logistics inquiries, and coordinating with carrier partners to ensure timely order fulfillment.

EDUCATION

Bachelor's in Computer Science

CUNY Queens College • Queens, NY • GPA: 3.2 • 08/2022 - Expected 05/2026

Dean's list for 2 semesters

AWARDS & SCHOLARSHIPS

Dean's List • 06/2023

CUNY Queens College

Dean's List • 01/2023

CUNY Queens College

PROJECTS

Cybersecurity Organization • 09/2025 - 12/2026

CUNY Queens College

Three other students and I have been given the task to make our own cybersecurity organization. We had to make our own ISO and Statement of Applicability (SoA), and implement everything on a mock AWS server.

Database Project • 04/2026 - 05/2026

CUNY Queens College

Constructing a simple relational database, the professor has given all the tables and our goal was to design and implement the database.

State Pattern • 03/2026 - 04/2026

CUNY Queens College

We have been given a pattern (relevant in software engineering), and I was assigned the State pattern. I had to implement that pattern in Java code and show how it worked.

Lexical Analyzer, Recursive Descent Parser & Symbol Table System • 10/2025 - 12/2025

CUNY Queens College

Designed and implemented a complete compiler front-end in C++ featuring a lexical analyzer, recursive-descent parser, symbol table, and intermediate code generator. Built a custom scanner supporting various token types alongside robust error handling, integrated type promotion logic for implicit int and float conversions, and engineered a stack-based assembly output pipeline to generate instructions via infix-to-postfix traversal across multi-file source inputs.

SKILLS

C++, Cybersecurity, Hardware & Systems, Java, LUA, Python, SQL, Tools & Software
